

NO IDLING

Children Breathing

DID YOU KNOW...

Children are especially vulnerable to air pollution caused by idling.

- Children breathe about 50% more air per pound of body weight than adults.
- Because children are lower to the ground and closer to exhaust pipes, they are at a greater risk of inhaling pollution from idling cars.

You and your children are not safe from air pollution inside an idling vehicle

- Exposure to some pollutants are actually higher inside the car than at the roadside.

Idling harms your engine and exhaust system

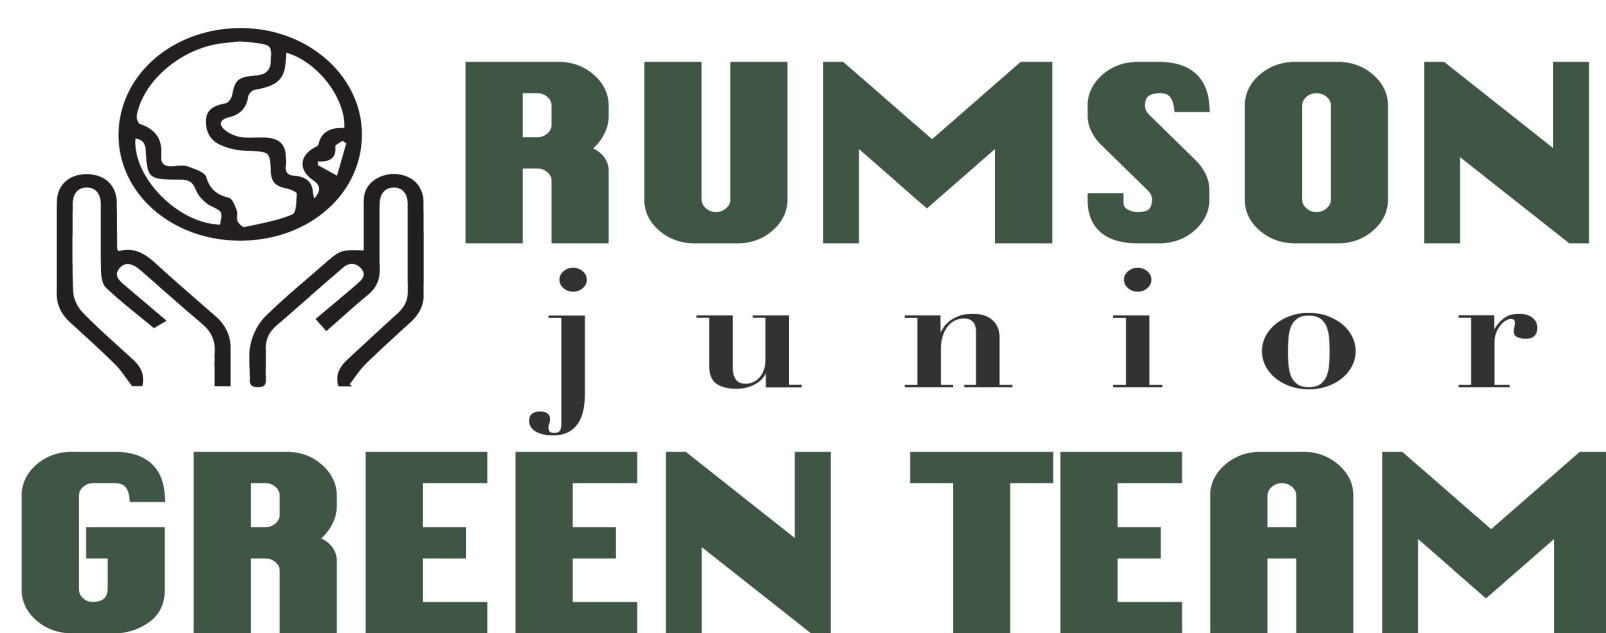

- Just ten (10) seconds of idling uses more fuel and emits more pollution than stopping & restarting your car.

Idling is not permitted in New Jersey

- Idling more than three (3) minutes while parked is against the law in New Jersey (N.J.A.C. 7:27-14,15).
